

Hydraulic Model Training Subscription Program

consistency accountability flexibility documentation collaboration

- Online workshops for anywhere accessibility
- Dedicated hydraulic model technologist for personalized, any-time technical support
- Accruing workflows and documentation for ongoing reference course materials
- Exercises for the day-to-day needs of the Utility
- Seminars delivered by industry leaders
- Online library consisting of video tutorials, quizzes, workflows, calculators, and more...

Reduce training costs and obtain continued return on your hydraulic model investment with the industry's only year-round, online-based hydraulic model training program.

IDModeling's IACET Certified Training Subscription Program consists of a series of live, online, interactive training workshops that are designed to provide consistent training and support for today's hydraulic model professional.

Optimal Way to Empower your Modelers:

The combination of scheduled hydraulic modeling assignments for each student, documented step-by-step workflows, online anytime-accessible resource library (videos, presentations, etc.) has proven to be an optimal way of learning and retaining knowledge from hydraulic model training. Plus, these training sessions provide a forum to network with other hydraulic modelers from other utilities that are using the same, or different, hydraulic modeling software. Lastly, advanced hydraulic modeling topics presented online by industry experts are also included with the training subscription.

"IDModeling tailored this course around the needs of our engineers. The flexibility, documentation, and collaboration with other utilities brings incredible value to this Program for any water industry professional"

– Burbank Water & Power, Glendale Water & Power, Indio Water Authority, City of Arcadia, City of Orange, and Castaic Lake Water Agency

| Per student costs | \$995 | \$2,495 |
| For up to six students from one site location | \$1,995 | \$5,995 |
| Unlimited students from one site location | \$4,995 | \$9,995 |

Introduction Training

Learn core software features required to perform your day-to-day distribution or collection system tasks

Workflows

Access step-by-step workflows customized for each training sessions

Information Sharing

Network with other hydraulic modelers that are using the same

Modeling Seminars

View live or recorded hydraulic modeling seminars held by industry experts on modeling/engineering trends

Presentation Slides

Access presentation slides from all training sessions and modeling seminars

Video Tutorials

View YouTube videos on various functions of the hydraulic modeling software

Recorded Sessions

View recorded sessions at your convenience at home or at the office as many times as you want

Online Calculators

Perform quick, useful, hydraulic modeling calculations online

Quizzes

Assess knowledge retention and receive immediate feedback

Hydraulic Model Calendar & Helpful Links

Keep track of important training/industry dates and access a growing list of online resource links

Technical Support

Participate in live dedicated support session as well as online forum specific for training subscribers

Assessments & Surveys

Provide direction to your course agenda and course instructor(s)
